Laptop Price in Bangladesh 2023

A laptop is a compact, movable computer that combines the factors, inputs, and outputs of a desktop computer into a single device that you can take with you and use in different locales. The most common components of a laptop include a display screen, keyboard, touchpad or pointing device, speakers, microphone, processor, memory, storage, and battery.

The processor is the "brain" of the laptop and is responsible for processing data and executing instructions. Memory, also known as RAM, is used to temporarily store data and
